## Vladilen Kozin

## Clojure(Script), Racket, Emacs Lisp, Redex, JavaScript, OMeta, meta-programming Fall\*13 Recurse Center (aka Hacker School) alum UK Tier 1 Exceptional Talent visa holder

	Corporate ladder
Apr-Nov 2017	Senior Programmer at Droit (London, UK)
2015-2017	Same as before but with obligatory daily commute.  Programmer/Consultant at Droit (New York, USA - remote)
2010 2017	Building an expert system for compliant trading. Sneaking Clojure(Script) into unsuspecting financial giants. On any given day I could be designing DSLs, implementing compilers, parsers, rule-based engines, putting together simple browser-based GUIs and whatever els the startup file would have me do.
2014-2015	Programmer at Yandex (Moscow, Russia). Officially a member of Search Interfaces Development Infrastructure group, but mostly I wrote backent looks for source to source compilation - engines to write your template engines. If I were lucky and did it right frontend developers would get to use my work and take all the credit.
2009-2011 2007-2009	take all the credit.  Equility Derivatives & Structured Products Salesat Renaissance Capital (Moscow, Russia).  EM Structured Solutions and Derivatives Salesat Barclays Capital (London, UK).
	Projects
Emacs Lisp	Author of multi.el - all things multiple dispatch for Emacs Lisp: type driven dispatch with protocols, ad-hoc polymorphism with multi-methods, pattern-matching and destructuring without noise with multi-patterns, case-dispatch with multi-defuns, benchmarking with multi-
Racket	benchmarks.  Author of prelude that extends Racket with generic associative API, Lua-style meta-tables f prototypal inheritance and more.  Author of ponzi - the beginnings of a clever Scheme for a discerning smart contract builder.
	WIP but it does implement the Ethereum Virtual Machine close enough to the Yellow Paper. Author of ometa-racket, a mostly complete Racket implementation of OMeta - OO pattern- matching language that extends PEGs with ability to handle left-recursive rules and match structured data.
	Author of skish, a mostly futile attempt at porting Olin Shivers' wonderfulscish to Racket. scsh is a non-interactive Unix shell embedded within Scheme (originally Scheme48). Contributor to Racket the language.
Clojure	Author of several closed-source products: FpML message parser, financial derivatives classifier based on ISDA taxonomies, legal annotation tools, PDF and XML content extractor and transformation tools.
	Author of bot - a crypto-currency arbitrager that could talk to several exchanges including Biffinex and GDAX. It uses Clojure Spec to parse and validate protocol messages and alept for async communication and concurrency.
	Author of playrum - just getting the taste for React in ClojureScript.  Contributor to seqexp, regular expressions for Clojure sequences.
JavaScript	Author of bemintml-syntax, a syntax converter for BEMHTML - an XSLT inspired templating
	language - part of BEM methodology of frontend development.  Author of bemintmi-source-convert, a best effort compiler from BEMHTML templates to BH templates.
	Author of xijst-more, an XLST-based compiler for BEMHTML templates that facilitates incremental compilation of templates potentially on the Client. WIP. Contributor to ometa-js, a JavaScript implementation of OMeta.
	Contributor to bem-xjst, XJST-based compiler for BEMHTML templates.
	Formal education
2004-2006	Keldysh Institute of Applied Mathematics (Moscow, Russia) PhD track in Applied Mathematics, dropped out
2004	New Economic School (Moscow, Russia) MS in Economics track with full scholarship, dropped out
1999-2004	Lomonosov Moscow State University (Moscow, Russia) MS in Theoretical Mechanics and Applied Mathematics.
	Autodidacticisms
2012	How to Design Programs by Matthias Felleisen et al.
2012	How I was introduced to programming. Assorted solutions to HtDP.  Programming Languages, [Certificate]
	Brown University  How I was introduced to creating PLs. Taught by Shiriram Krishnamurthi based on his wonderful PLAI text. My solutions - a sequence of interpreters for progressively more complex languages: all the way to OOP, CPS transforms and type checkers.
2014	Harriware/Software Interface [Certificate 89 6%]
	University of Washington for Coursera  How I was introduced to systems programming. Essentially an introduction to Computer Systems course as taught at Carnegie Mellon with the same course-load and text Compute Systems: A Programmer's Perspective by Bryant and O'Hallaron.
2014	Systems: A Programmer's Perspective by Bryant and O'Hallaron. Paradigms of Computer Programming 1, [Certificate1 94%] Paradigms of Computer Programming 2, [Certificate2 97%]
	Université catholique de Louvain for edX
2015	paradigms that so far seem to exist only in academic setting. Taught by Peter Van Roy and is based on his classical Concepts, Techniques, and Models of Computer Programming. Introduction to Probability, (Pertificate 94%) MIT for edX.
2017	Because it's awesome.
	Redex for designing operational semantics The Racket Summer School of Semantics and Languages in Salt Lake City, Utah. While targeted at PL PhDs a bunch of us non-academic types had been admitted. Learnt to create languages quickly and back them up with runnable reduction semantics - what's not
2018	to like?  Language-oriented Programming and Language Building The Racket Summer School 2018 in Salt Lake City, Utah.
	Public Speaking
due July 2019	I will be an invited speaker at RacketCon'19 in Utah
	Languages
Russian, English	Equally uncomfortable.
Clojure Racket Emacs Lisp	What I get to use on the job. Can't complain. Favorite Lisp. Would be my weapon of choice were such choice ever offered. Unavoidable Lisp for any Ernacs user. It is surprisingly fun to code.
Emacs Lisp JavaScript OMeta	Unavoidable Lisp for any Emacs user. It is surprisingly fun to code.  Wrote fair amount, mostly backend compiler stuff with Node.js.
Redex	Wrote fair amount, mostly backend compiler stuff with Node js.  Extensive experience writing paraers with complex and context dependent grammars.  Can implement executable semantics for your pet-language or DSL.
Java C Factor, OCami, Lua, Rust	Enough to write a Clojure wrapper with necessary bindings.  Enough to pass a systems programming class but not hearly enough to actually use it. Toyed with but never used in earnest. Iported some good ideas from Lua to Racket and contributed a patich to racer-rust.
	Activities and interests

Activities and interests

Most of my achieva and interestates.

Most of my achieva and interests these days involve boxes with lights and buttons. Even so there were reports of me cycling, bouldering, surfing, roller-skalting, skiing and more. Having owned a sports car I'll choose a bubyler every time.

Lived in the LIK, LIS, Hungsay, Spain and far more exotic places. Crossed the US from Mexico to Canada twice with the current static count of 19.
